To Whom it May Concern

Reference: MRI Compatible Outlets

Dear Sir/Madam,

Please accept this letter as our attestation that Gemini Outlets as marketed by BeaconMedæs are suitable for use in MRI settings.

We assert the outlet is composed of diecast zinc, brass and non ferrous materials. There are three stainless steel parts, the screws, which may be replaced with chrome plated brass screws of similar thread and a retaining ring, which should exhibit no magnetism and is securely affixed to the outlet.

Yours faithfully,

Director of Marketing
