

R 5 0025 - 0630

RA 0630

Description

Modular designed Busch R 5 oil-sealed rotary vane vacuum pumps are single stage, air-cooled, and direct-driven. This oil-recirculating design is one of the simplest and most reliable vacuum pumps available on the world market. These rugged pumps are used in a variety of industries such as packaging and food processing, rubber molding, thermoforming, printed circuit board testing, hospitals, laboratories, robotics, vacuum lamination, printing, and many others.

Features

- Compact, simple design for easy installation and low maintenance
- Air-cooled, requiring no water
- Direct driven, eliminating belts and gears to loosen or wear
- Quiet operation
- Continuous duty
- Easy exhaust filter change
- High quality US made motors

Standard Equipment

- TEFC motor
- Motor starter (optional)
- NPT inlet on most models
- Exhaust pressure gauge
- Anti-suckback valve
- Built-in exhaust filter
- Wire mesh inlet screen
- Non-metallic, non-asbestos vanes
- Vibration isolators
- Automotive type spin-on oil filter
- Oil level sight glass

Rotary vane vacuum pumps

Operating Principle

Operating Principle

Rotation of the pump rotor, which is mounted eccentrically in the pump cylinder, traps entering vapor between rotor vane segments. As rotation continues, vapor is compressed and discharged into the exhaust box.

Vapors then pass through several stages of internal oil and mist eliminators to remove lubricating oil from the exhaust. The oil that is separated is then returned to the oil reservoir.

Additional features include an automotive type spin-on oil filter, and a built-in inlet anti-suckback valve that prevents the pump from rotating backwards.

A built-in gas ballast permits pumping with high water vapor loads and provides oil drying for maximum performance.

Accessories

- Motor starters and controls
- Inlet air filters
- Liquid separators
- Exhaust Silencers
- Control valves
- Vacuum gauges
- Vacuum switches and transmitters
- Lubricants
- Vacuum receivers

Applications

- Packaging industry
- Food industry
- Pneumatic conveying
- Transport and lifting systems
- Medical technology
- Central vacuum systems
- Environmental technology
- Woodworking
- Plastic industry
- Ceramics and brick industry
- Sewage transfer
- Textile industry
- Beverage industry
- Paper industry
- Printing industry

Technical Data

Pumping Speed vs. Inlet Pressure

Technical Data		0025	0040	0063	0100	0165	0205	0255	0305	0400	0502	0630
